

GGNB: Short Methods Courses & Method Seminars; Extended Methods Courses

Preliminary program October 2018 - March 2019 (winter semester 2018/19)

- subject to change -

- Registration possible two months before the course month -

Department/Group	Supervisor(s)	UniVZ	ID	Title of Course	Credits	Date
Biochemistry						
Ischebeck, Till	Ischebeck, Till	340243	A 198	Metabolite profiling (GC-MS)	1.0	3-4 Dec 2018
Molecular Biology & Genetics						
Cramer Patrick	-	340316	A 214	Genome Science Lecture Series	1.5	Fridays
Structural Biology						
Stark, Holger	Niels Fischer	340378	A 225	Single particle cryo-EM of macromolecular complexes and cellular electron tomography	2.5	10-14 Dec 2018
Biophysics, Bioinformatics and Statistics						
Grubmüller, Helmut / Schmidt, Christoph F.	Grubmüller, Helmut / Schmidt, Christoph F.	340166	A 025	Current Topics in Biophysics – Lecture Series	1.0	Fridays
Nietert, Manuel	Nietert, Manuel	340389	A 215_2	An introduction to reproducible handling of scientific data and concordant analysis using KNIME workflows	0.5	10-14 Dec 2018
